

Cutlite Operational Training

WORK INSTRUCTION PL-04	REVISION DATE 3/26/2026	Page 1 of 3
----------------------------------	-----------------------------------	-----------------------

1.0 Purpose/Scope:

- 1.1. The purpose of this procedure is to outline how a new employee will be trained step by step in operating the Cutlite Penta Fiber Laser Machine.
- 1.2. The initial goal is to observe and practice proper safety while implementing our standard practice according to established Steel Warehouse SOPs.
 - 1.2.1. Each week there will be a series of tasks, where the operator in training will learn and apply for the following week.
 - 1.2.2. Weekly information is strongly encouraged by the Trainer that all new operators should take notes
 - 1.2.3. Lastly a short quiz will be presented to ensure all operators have attained the previous week's training and subject to demonstrate

2.0 Procedure

- 2.1. Week One – Initial Introduction of the Cutlite Penta
 - 2.1.1. Safety practices loading and unloading material
 - 2.1.2. Handling parts by operating the machine's jib cranes with its attachments
 - 2.1.3. Proper housekeeping using the company's 5S methods
 - 2.1.4. Steel Warehouse goals to increase production
 - 2.1.5. Maintaining and shipping good quality parts
- 2.2. Week Two – Pre-operations
 - 2.2.1. Daily operator roles and responsibilities to include expectations for before and end of shift
 - 2.2.2. Start-up
 - 2.2.3. Daily Inspections
 - 2.2.4. PLEX log-in setups, downtime and job program navigating

Cutlite Operational Training

WORK INSTRUCTION PL-04	REVISION DATE 3/26/2026	Page 2 of 3
----------------------------------	-----------------------------------	-----------------------

- 2.2.5. Difference between assigned and allocated material
- 2.2.6. Quality and defect checks
- 2.2.7. Nozzle sizes (use) and gas variances
- 2.2.8. Beam centering
- 2.2.9. Machine's sensor calibration
 - 2.2.9.1. Including gas or purge test
- 2.3. Week Three and Four – Level One phase
 - 2.3.1. Trainee has basic knowledge of job
 - 2.3.2. Trainer will have new operator summarize what was learned during the previous two weeks by demonstrating each task
 - 2.3.3. Pulling up program files from laser's control panel
 - 2.3.4. Designating origin margins
 - 2.3.5. Modifying databases for material gauge variances
 - 2.3.6. Start and stop work strategy
 - 2.3.7. First piece quality inspection
- 2.4. Last week – Operator phase
 - 2.4.1. Focus on job production
 - 2.4.2. Inventory routing
 - 2.4.3. Depleting laser skeletons
- 2.5. Upon completion of all the training phases, operator will be signed off on Form 0332 – Laser Operator Training Quiz
